- DND
- Ideal for businesses

VoIPon Hosted IP PBX Premium is £24.95/mo exc. VAT per extension. An initial payment will be required when you purchase, by Credit or Debit card, followed by monthly payments which will be payable via Direct Debit.

User-friendly web portal

The modern and intuitive web portal allows for every component of the Hosted VoIP solution can be controlled by the user. The web portal can be accessed via Internet browser from any location in the world, meaning users do not have to be in the office to change how calls are routed.

Call Waiting

The Call Waiting feature alerts users if another caller is trying to get hold of them while they are on the line. The system will present a beep via handset and the IP phone will display information on the waiting call.

Call Forwarding

The Call Forward feature allows users to automatically forward either all or selected calls to any internal extension or external destination including mobiles and public phone numbers. Multiple devices can be alerted at the same time meaning the system can be configured to ring a mobile phone, desk phone and soft phone simultaneously. This feature can be controlled from any Internet connected device at the click of a button.

Voicemail (with voicemail to email function)

The flexible voicemail feature can be configured to answer calls on the user's behalf and take messages from callers. The feature can be configured to automatically send any messages to email and can also be accessed from any extension or through the web portal in any location worldwide. Emailed messages can be reviewed on most smartphones without needing to place a call.

Voipon Hosted IP PBX Premium - Cloud based PBX

DND - Do Not Disturb

Once enabled from the phone terminal, the DND feature enables users to enjoy full privacy if they need to get a task completed.

Call Cascading Call Cascading enables each extension to be configured so that if an inbound call is not answered in a set time-frame, calls will be cascaded through a list of extensions until someone is able to answer the call.

Ring All Feature The Ring All feature allows each extension to ring not only itself but any number of other extensions when an inbound call is presented to it. **Interactive Voice Response (IVR)** The IVR feature allows companies to present inbound callers with a welcome message followed by options to aid with the correct routing of calls to required destinations. This versatile IVR solution enables companies to create IVRs with multi levels and contexts and can route calls based on a whole range of call criteria. **Call Parking** Calls can be parked in a private lot and picked up later, freeing up staff member's phones in busy environments.

Music On Hold Voipon Hosted PBX allows you to upload any Music on Hold (copyright permitting) file to the Hosted PBX. It can be a standard music file or a custom voice message. This is ideal for call queues, this can be configured to route calls based on a variety of criteria and play music and messages to callers as they wait. **Inbound Call Routing** Direct calls to where you need them to go, when you need them to go there. **Conference Call** Make the most of conference calls with a number of different participants. **Hunt Group** Hunt Groups enable extensions to be called based on a set of rules applied. Calls can be transferred to a specific set of extensions. **Hosted Fax** Send and receive faxes online using any email program with maximum security.

An initial payment will be required when you purchase, by Credit or Debit card, followed by monthly payments.
