

Bria Softphone client for Desktop PC

Product Name: Bria Softphone client for Desktop PC

Manufacturer: Counterpath

Model Number: BRIA-DESK

Bria Softphone client for Desktop PC

Bria 4 is a carrier-grade SIP softphone client that enables you to manage your communications easily from your Mac or Windows laptop. Bria 4 can replace or complement your desk phone, allowing you to make voice and video calls over IP, see if your contacts are available, send messages, and share your screen.

Built on SIP and open standards, Bria 4 is proven interoperable with many of the industry's standard platforms and devices. It also includes features specifically designed for business and enterprise users and can be deployed within an enterprise environment either by manual configuration via the softphone Graphical User Interface (GUI) or by using the provisioning module of CounterPath's Stretto Platform.

New to 4.4

• More Emoji Support. Colour emojis and a greater variety of emoticons are now offered to enhance your chat sessions.

• Video Window Enhancements. Controls have been added on the video window that let you view, change and select more options while previewing your video or while you are on a video call.

• Network Quality Indicator. Bria now displays your Wi-Fi and network performance up front on the interface while you are in a call.

• Headset/Speakerphone Device Selection. Bria's user interface now provides a dropdown menu for you to select headset or speakerphone mode instead of just a button to toggle between them.

• Announcements Tab. The option for an Announcement tab has been added to provide you with important product or service related announcements from CounterPath. This tab will only display when a message is available and you will have the ability to dismiss and/or remove the tab once a message is viewed.

• Broadworks SIP Extension Enhancements. Primarily for call centre environments, this feature provides the third party with the ability to answer or hold calls when set in your Preferences.

• For more details and additional notes on improvements to Bria Stretto and Bria branded builds, please see the Bria 4.4 Release Notes in the Resources section.
