Jablocom JabloPhone GSM Desk Phone

The Jablocom JabloPhone is a sophisticated GSM Desktop Phone which is actually a mobile phone operating on a GSM network in the shape of a desktop phone. It has a large adjustable display with a full QWERTY keyboard, speakerphone and quick dialling keys for the most frequent contacts.

Jablocom Jablophone Key Features

- Quality speakerphone
- Quick dialling with 6 memory keys
- Large illuminated graphical LCD adjustable display
- Built-in QWERTY keyboard
- Call transfer, conference call, hold and mute function
- No need for lots of wires
- Wireless mobile technology makes the JabloPhone ideal for shops, hotel receptions or showrooms
- 2 years warranty as standard

The Jablocom JabloPhone also supports the advanced office functions such as call transfer, conference call, hold and mute functions. Thanks to PC connectivity and JabloTool, you can use the Phone connected to a PC as your virtual PBX solution. JabloPhone is suitable for both the consumer and business market.
