Gigaset CL660HX DECT Handset

The Gigaset CL660HX cordless telephone is ideally equipped for the future of telephony thanks to the possibility to connect to all routers that support DECT. The Gigaset CL660HX also features a high-quality finish and flush-mount design and the flush keys underscore the telephone's high quality.

Gigaset CL660HX Key Features

- DECT/GAP routers Routers with DECT CAT-iq 2.0/2.1 Gigaset DECT base stations
- Large 2.4" TFT colour display with modern user interface (50 x 38 mm)
- Brilliant sound quality (HD Voice), even in the hands-free mode
- Address book for up to 400 contacts with 3 telephone numbers each
- Slim modern design
- HX universal handset for connection to any Internet router with a DECT base station
- Brilliant voice quality, even in the hands-free mode
- Customisation using own images and ring tones
- Up to 400 entries in the telephone book
- Connection to a PC or Mac via micro USB

The frameless illuminated keypad ensures optimum ease of use. The classic anthracite colour lends the cordless telephone particular elegance. The redesigned navigation key and the large high-resolution display fit in perfectly with the modern look and make the Gigaset CL660HX a real eye-catcher.

The CL660HX universal handset is suitable for all common Internet routers, e.g. for the FRITZ!Box, the Telekom Speedport and many other models. You thus automatically use state-of-the-art Internet telephony and with the CL660HX you benefit from natural sounding audio quality in HD Voice.

In addition you have numerous convenience functions at your disposal: a router-internal answering machine, access to the router's telephone book as well as lists of incoming, outgoing and missed calls. The CL660HX cordless telephone allows you to easily personalise your telephone with individual ring tones, your own photos and screensavers. Call display with a picture of the caller is also possible if you have stored the contact in your address book with a picture. Easily personalise your CL660HX using the free Gigaset QuickSync software, which you can download for your PC or Mac [here](#).
