Cyberdata Singlewire InformaCast Loudspeaker Amplifier-PoE (011407)

Product Name: Cyberdata Singlewire InformaCast Loudspeaker Amplifier-PoE (011407)
Manufacturer: CyberData
Model Number: 011407

Cyberdata Singlewire InformaCast Loudspeaker Amplifier-PoE (011407)
The Cyberdata Singlewire InformaCast Loudspeaker Amplifier-PoE is for use with Singlewire's paging and emergency notification software InformaCast® or InformaCast CK.
Cyberdata 011407 Key Features

ï¿½ Now offers dual registration for both SIP and Singlewire
ï¿½ SIP Enhanced interoperability for hosted environments
ï¿½ Support for security code access for SIP paging
ï¿½ Autoprovisioning via HTTPS
ï¿½ HTTPS web based configuration
ï¿½ Support for G.722 codecs
ï¿½ 802.11q VLAN tagging
ï¿½ Configurable sense input for use with fault detection
ï¿½ Configurable event generation for device health and status monitoring
ï¿½ Optional direct connect RGB strobe kit connection (coming soon)
ï¿½ 9 user-uploadable page messages

This PoE-powered device now includes some brand new features such as dual registration for both Singlewire and SIP, and hooks up easily to new and existing Singlewire installations, providing an easy method for implementing a loud IP-based overhead paging system for loud areas, warehouses, manufacturing areas, and outdoor areas.

Price: £669.50
