Sangoma s400 VoIP Phone

The Sangoma s400 is a full feature set phone with three Session Initiation Protocol (SIP) accounts at a competitive price point. The s400 IP phone can quickly locate FreePBX /PBXact to automatically and easily get full configuration right out of the box – true Zero Touch Configuration. Sangoma s400 VoIP Phone Features

- 3x SIP Accounts
- Full Duplex Speaker Phone
- 5-way Conferencing
- 2.7 Inch Graphical LCD with Backlight
- 25 Programmable Soft Keys
- EHS Support for Popular Wireless Headsets
- Built-in VPN for Plug & Play Security for Remote Users
- Optional Annual Support & Software Maintenance Plans

Designed to work with FreePBX and PBXact, Sangoma IP phones are so smart you can quickly and easily use them right out of the box. The s400 features industry standard Power over Ethernet, so no power cable or outlets required. It has full duplex speakerphone, dual 10/100 Mbps Ethernet ports, 5-way conference calling, high definition voice quality, and built in Virtual Private Network (VPN) capability. Zero Touch Provisioning VoIP telephones can be complex to install, and manually configuring many different parameters and hundreds of extensions can take hours. When you buy and install your Sangoma IP phones, the redirection server automatically points the phone to the Sangoma FreePBX / PBXact for configuration. Other vendors have redirection servers, but they have to be programmed with details of the IP PBX. Only Sangoma can provide Zero Touch provisioning with FreePBX / PBXact. EndPoint Manager Included. When using a Sangoma phone, EndPoint Manager software inside FreePBX / PBXact is automatically enabled. This lets your users control global settings, program their phone keys, map extensions, upload images, download new firmware, and much more.
