

VoiSmart SIP/GSM Gateway Rack - 12-32 channels (GW-9550-06-12SIM)

Product Name: VoiSmart SIP/GSM Gateway Rack - 12-32 channels (GW-9550-06-12SIM)

Manufacturer: -

Model Number: GW-9550-06-12SIM

VoiSmart SIP/GSM Gateway Rack Unit - 12-32 channels (GW-0930-02-RACK)

VoiSmart SIP/GSM Gateway Rack Unit is an Asterisk-based IP Gateway which allows you to transform fixed-to-mobile into mobile-to-mobile traffic in the simplest and most efficient way. It's a true "black box", which can be reached as a SIP client/server. It allows multiple simultaneously active GSM channels in a scalable solution that can run from 12 to 32 engines (each slot can host a vGSM 4 engines PCI card).

The VoiSmart Gateways support SIM server functionalities for remote and central storing of any number of Smartcards/SIM.

No extra hardware to be added, no installation effort, no technical skills required: a real plug-and-play device, designed to make your business immediately running. You can see it as a standard SIP client/server, and integration is done. LCR and smart routing of incoming calls are immediately available, as well as all its powerful features.

A Professional Solution for Professional use

Powerful and versatile, think of it as a pure node in the network. VoiSmart SIP/GSM gateway is the building brick on which you will rely to implement high profile solutions, as well as the next door to the world of message communication.

A perfect match for Asterisk architectures, ready to be integrated in non-Asterisk environment as well.
