

Panasonic KX-UDT131 IP65 Tough DECT handset

Product Name: Panasonic KX-UDT131 IP65 Tough DECT handset

Manufacturer: Panasonic

Model Number: KX-UDT131

Panasonic KX-UDT131 IP65 Tough DECT handset

The Panasonic KX-UDT131 is for communication in tough environments as it's protected from drops on concrete floors and dust from diesel engines. This model also has built-in Bluetooth support allowing a wireless headset to be used so you can have a phone conversation while working with both hands and it's designed to be operated even with a gloved hand. This range is platform independent and can work with any SIP compliant service, enabling high quality wireless communications in any business. Networks of up to 128 cell stations and 255 handsets can be created. The new Panasonic range features three new fully featured DECT handsets, plus a new 4 channel High-Definition Voice DECT cell station. All handset models include a full duplex hands free mode and headset support, giving the user plenty of options for keeping both hands free while staying in touch.

Panasonic KX-UDT131 - Technical Specifications

Large warehouses

In large warehouses, which are often metallic environments, more than one cell station is needed to cover the entire premises. So a multi-cell solution is required. As part of these multi-cell solutions, the KX-UDT131's rugged design and dust protection make it ideal for the tough conditions found in a warehouse.

Medium-sized and enterprise offices

Mobility is critical in these offices, as professionals need to stay connected everywhere if efficiency is to be maximised. A combination of KX-UDT121 handsets and Bluetooth technology provides complete mobility solutions for managers and team leaders.

Hotels

To deliver the best possible customer service, all staff need to be connected, wherever they are and whenever they're working. Multi-cell solutions from Panasonic give the complete coverage required – including in parking areas and within maintenance departments. For maintenance staff, the rugged KX-UDT131 is perfect. For room service, the KX-UDT111 is suitable due to its price and quality.

Hospitals

Using the KX-UDT121 and Bluetooth technology, doctors and medical staff benefit from the complete mobile connectivity they need. Equally, maintenance staff can rely on the rugged
