Product Name: RTX G729 audio module for 8630 Dect Base (RTX8630-G729-Mod)
Manufacturer: -
Model Number: RTX8630-G729-Mod

Please Note: This product has been discontinued. Please see the RTX DECT Repeaters & IP Phones.

RTX G729 audio module for 8630 Dect Base (RTX8630-G729-Mod)
Because of its low bandwidth requirements, G729 is mostly used in voice over Internet Protocol (VoIP) applications when bandwidth must be conserved, such as for conference calls. To enable this feature on your 8630, a G729 audio module is needed for the RTX8630 system (Iserve Base). G729 support is optional.
