Digium Switchvox 470 Appliance, UK

The Digium Switchvox 1AS4700013LF, built on Asterisk, is Digium's Unified Communications (UC) solution for SMBs. Each Switchvox UC system supports VoIP and traditional calling while also incorporating many key features to enable your business communications. Switchvox is easily provisioned with a GUI that allows you to configure multiple users and setup your entire system quickly.

Switchvox 470 is ideal for large businesses that want the highest performance, highly redundant, full-featured rackmount PBX.
