DrayTek Vigor 2862 ADSL Router
The DrayTek Vigor 2862 ADSL Router is a flagship router/firewall. This router supports both ADSL and VDSL (BT Infinity/FTTC), whilst also boasting several professional-level features to increase security, flexibility and functionality.
DrayTek Vigor 2862 ADSL Router Key Features

ï¿½ Supports VDSL2, ADSL, 3G/4G and Ethernet-based Broadband
ï¿½ BT SIN 498 MCT Approved
ï¿½ Wireless Management of compatible DrayTek APs
ï¿½ 5-Port Gigabit Ethernet LAN Switch
ï¿½ IPv4/IPv6 Dual-Stack

As well as ADSL/VDSL support, alternative WAN ports can instead provide connectivity to Ethenet feeds, secondary xDSL modems, or a 3G/4G cellular service using a supported USB adapter. These multiple LAN feeds can be combined for failover or load-balancing.A 5-port Gigabit Ethernet switch on the LAN side provides high speed connectivity for your server, other local PCs, or for uplink to a larger Ethernet switch. Comprehensive security features include content filtering, web application controls, and an object based firewall management system. Port 5 is switchable with 'WAN2' to use it as an Ethernet WAN port instead of a LAN port*. *requires f/w 3.8.8 or later, otherwise the 5th Ethernet port is for WAN2 only.
