

Cisco 8800 Key Expansion Module

Product Name: Cisco 8800 Key Expansion Module

Manufacturer: Cisco Systems

Model Number: CP-8800-A-KEM

Cisco 8800 Key Expansion Module

The Cisco IP Phone 8800 Key Expansion Module allows users to extend the capabilities of Cisco 8851 and 8861 phone models with additional buttons and a large supporting colour LCD display.

Cisco 8800 Key Expansion Module Key Features

- 4.3" high-resolution colour display (480x272 pixel)

- 18 physical buttons (36 using page keys)

- Compatible with:

- Cisco 8851 (up to 2 modules can be daisy chained)

- Cisco 8861 (up to 3 modules can be daisy chained)

- Powered by host phone

- Wall mountable

For use with: Cisco 8851 IP Phone Cisco 8861 IP Phone

Each key expansion module adds 18 physical keys with access to 18 additional keys, using the illuminated page keys, for a total of 36 additional useful function keys. You can daisy chain up to three 8800 KEMs to the IP Phone 8861, and up to two 8800 KEMs to the IP Phone 8851.

The Cisco IP Phone 8800 KEM doesn't have its own local power supply; it gets power from the attached phone.

Supported power options:
