

Digium TDM10B - 1 FXS

Product Name: Digium TDM10B - 1 FXS

Manufacturer: -

Model Number: -

Please Note: The Digium TDM10B has been discontinued. For an alternative, we highly recommend the Digium A4 Series.

The TDM10B 1 phone extension (fxs) serves as an interface with analogue telephones or analogue lines for integrating into Asterisk PBX. Used in conjunction with Asterisk a user can create a SOHO (Small Office Home Office) telephony environment which includes all the sophisticated features of a high end PBX platform. The TDM10B 1 phone extension (fxs) takes the place of an expensive channel bank and brings the system price point to the lowest in the industry. To scale this solution simply add additional modules or TDM cards as required. Until now, this low cost and revolutionary solution had yet to be filled in the telephony space.
