Sangoma A22 2-Line Gigabit IP Phone for Asterisk

The Sangoma A22 IP Phone (previously Digium) is entry-level gigabit phone with 2 line registrations, a full-colour LCD display, and 2 switched 10/100/1000 Mbps Ethernet ports. This model is Sangoma's best value for organisations on a budget who require gigabit networking. Features Sangoma A22

- 2.8 inch backlit colour LCD display
- 2 line appearance keys
- 1 feature key
- 4 context-sensitive soft keys
- 5-way navigation controller
- Headset, speaker and mute keys
- LED Message Waiting Indicator

Keep your phone system project expenses to a minimum with the Sangoma A22 IP phone for Asterisk, the A22 is the ideal phone for low-cost Asterisk deployments. The budget-friendly IP phone provides the essential tools you need to complete your Asterisk installation. The streamlined feature set includes standard applications, such as auto-answer, call waiting, and paging, to help your users communicate effectively and easily. Sangoma A-Series IP phones are not supported for use with Switchvox. For phones supported with Switchvox, please see Sangoma D-Series IP Phones.
