The S305 has zero touch provisioning that allows easy configuration and set up right out of the box making it the SIP phone you need sitting at your desk today.Sangoma S305 SIP Phone Overview The S305 contains two (2) Session Initiated Protocols (SIP), dual Ethernet ports, and is headset compatible. Its simple and sleek modern design incorporates 4 line keys with dual-color LED with 15 programmable features. The Sangoma S305 allows for full integration with phone apps so that the user can manage complicated features directly from their phone. The S305 also features Power over Ethernet (PoE) so you don't have to worry about placing the phone near outlets or purchasing separate power cables. The S305 is the answer to your VoIP telephony needs.Zero Touch ProvisioningVoIP telephones can be complex to install, and manually configuring many different parameters and hundreds of extensions can take hours. When you buy and install your Sangoma IP phones, the redirection server automatically points the phone to the Sangoma FreePBX / PBXact for configuration. Other vendors may have redirection servers, but they have to be programmed with details of the IP PBX. Only Sangoma can provide Zero Touch provisioning with FreePBX / PBXact.EndPoint Manager IncludedWhen using a Sangoma phone, EndPoint Manager software inside FreePBX / PBXactis automatically enabled. This lets your users control global settings, program their phone keys, map extensions, upload images, download new firmware, and much more.Full Integration with Phone AppsPhone Apps are a bundle of advanced applications (or features), which install directly onto your IP Phone, converting all your complicated features into easy-to-use visual applications, which you control, directly from the phone’s display.
