The integrated WLAN controller offers easy WLAN scalability for the growing demand for WiFi; while WAN and VPN load balancing and failover ensures non-stop business communications. Zyxel USGs offer industry-leading Anti-Virus, AntiSpam, Content Filtering 2.0 and Application Patrol technology for effective application optimisation and comprehensive network protection.
Impregnable protection and optimisation
ZyWALL USG110 thoroughly protects networks with industry-leading firewall, Anti-Malware/Virus, Anti-Spam, Content Filtering, IDP, and Application Patrol functionality. Regulate unauthorized use of Web applications over your network, such as Facebook, Google apps, and Netflix, among others. Zyxel security measures are enhanced with SSL Inspection, blocking threats hidden in SSL-encrypted connections while facilitating deeper policy enforcement. Furthermore, newly improved Content Filtering 2.0 enhances HTTPS Domain Filter, Browser SafeSearch, and Geo IP Blocking for an array of security enhancements to ensure clean Web connections.
Powerful, robust and always-online
ZyWALL USG Series delivers high-access quality to help businesses satisfy the demand for always-online communications. For internal deployments, the ZyWALL USG Series provides active-passive High-Availability (HA) service to support device or connection failover. With Device HA Pro service, the ZyWALL USG Series also supports instant failover, so connections are always maintained when a failover event occurs. For external deployments, the ZyWALL USG Series features multi-WAN load balancing/failover and a comprehensive mobile broadband USB modem support list for WAN backup operations. The ZyWALL USG Series also supports IPSec load balancing and failover, providing additional resilience for mission-critical VPN failover with VTI Interface deployments.
Multi-element service access
The ZyWALL USG Series helps SMBs meet the connectivity demands of an ever-growing legion of wireless devices. Each gateway in the series is integrated with a WLAN controller that enables users to manage up to 34 APs through a centralized user interface. Businesses can now easily scale up WLAN and provide WiFi in multiple areas, like meeting rooms and guest reception areas. Hotspot Management features — such as Billing System, Walled Garden, Multiple Authentications, 3rd Party Social Login, and User Agreement — to give businesses with a single unified solution for all required functionality
