Product Name: Yealink WPP20 Wireless Presentation Pod - DISCONTINUED

Manufacturer: Yealink

Model Number: WPP20

This product has now been discontinued.

Yealink WPP20 Wireless Presentation Pod

The Yealink WPP20 is a wireless presentation pod that partners up with Yealink's new-generation video conferencing system to offer high-quality wireless content sharing with just one tap.

Yealink WPP20 Key Features

• 1/2 USB 2.0

• 1/2 5GHz 802.11ac Wi-Fi Network

• 1/2 Plug and Play

• 1/2 Low Latency

• 1/2 1080P30fps Full HD Content Sharing

• 1/2 Embedded Meeting Assistant Software

• 1/2 Supports Windows/macOS

• 1/2 Supports Apple AirPlay

Working with the Yealink's video conferencing systems, the embedded meeting assistant software of the WPP20 offers rich conference control functions, such as recording or managing your video conference at the same time. Wireless deployment helps keep your workspace clean, and the integrated interactive touch screen puts remote control at your fingertips. Up to 8 devices can be connected at a time, providing you with the ultimate collaboration experience with low-latency content sharing.

Plug and Play, One-Click Presenting

With Yealink's self-built 5GHz 802.11ac Wi-Fi network and its perfect anti-interference capability, no routers or extra network configuration is required, WPP20 has low dependence to the business network and makes sharing smooth and easy. The WPP20 comes with a universal USB port, plug and play, and any other additional software is unnecessary. To minimise the deployment cost, this pod is designed to let you avoid messy cables and the hassle with interface adaptation, saving your time from setting-up additional wires between the TV and conference table.

Low Latency, Multipoint FHD Sharing

Immediate response, smooth and trouble-free presenting, 1080P@30fps FHD and low-latency content sharing, all allow you to enjoy an excellent collaboration. Meanwhile, one video conferencing system can simultaneously connect up to eight WPP20 devices and up to four content streams can be presented simultaneously on the main screen.

Plug into Rich Control Functions

Integrated with Yealink's video conferencing system, the embedded meeting assistant software has completely wiped out the remote controller, offering you rich meeting control functions, such as meeting recording, conference management and video conferencing endpoint control.

Multi-Platform Supported

Yealink's wireless presentation solution covers all devices you are using. Simply tap the button to share from your MacBook or Windows laptop, or via AirPlay from your iPhone/iPad.

Intuitive Remote Control from Interactive TV

Interoperable with a touchscreen television, reverse control of the computer or laptop is easily enabled by clicking or dragging directly on your interactive television when paired with the Yealink video conferencing system and a touchscreen television.

Yealink WPP20 Technical Specifications
