Draytek VigorSwitch P2500 Key Features

½ Designed for Centralised Management

½ IP Conflict Prevention

½ Voice VLAN & Surveillance VLAN

½ Energy-Efficient Ethernet

Designed for Centralised Management

Can be configured and monitored instantly through both the VigorACS cloud management platform and/or, a DrayTek Vigor router's central switch management. Benefits: Saves time and money. Easily provision, monitor and manage remote sites without on-site IT or dedicated staff.

Security

DHCP Snooping: Limit DHCP server responses to only a specified port. IP Source Guard:

Protects against address spoofing. Access Control List: Controls which packet types (IPv4, IPv6 & MAC) should pass between ports on the switch.

Energy-Efficient Ethernet

IEEE 802.3az compliant to reduce power consumption of ports during periods of inactivity and low link utilisation. Benefits: Reduces power consumption.

IP Conflict Prevention

Prevents IP conflicts caused by a misconfigured or malicious host and blocks illegal DHCP traffic. Benefits: Improves network stability and protects important servers from IP conflicts. Enables fast identification and exclusion of incorrectly configured devices.

Voice VLAN & Surveillance VLAN

Automatically assign VLANs and QoS configuration to devices with matching MAC address OUI upon connection to the switch. Benefits: Allows easy prioritisation of VoIP and IP Camera traffic and more control when implementing security policies.

Hardware Monitoring

It monitors and controls the switch's temperature, voltages and fan status. Integrated email notification alerts for voltage anomalies or temperature alarms. Benefits: Prevents network failure.

Ensures high availability.
