

2N IP/LTE Verso Security Bundle

2N IP/LTE Verso Security Bundle

Product Name: 2N IP/LTE Verso Security Bundle

Manufacturer: 2N Telecommunications

Model Number: 9155198SET

2N IP/LTE Verso Security Bundle

The 2N discount accessory bundle is for use with the 2N® IP Verso and 2N® LTE Verso intercoms. It features a combination of 2N accessories to increase security at entrance doors to the very highest level.

2N IP/LTE Verso Security Bundle

1½ Discount accessory bundle for use with 2N® IP/LTE Verso intercom units

1½ Tamper switch

1½ I/O module

1½ Security relay

The bundle includes a tamper switch, I/O module and security relay. The individual components of the bundle can also be ordered separately.

Tamper Switch

The tamper switch detects if the intercom is opened or the upper frame is removed. The module is installed in a special location and there is no need to set aside a separate slot for it.

I/O module

The I/O module contains two logic inputs and two relay outputs for the integration of various sensors and to control doors or other devices. The module is installed under a different module, i.e. there is no need to set aside a separate slot for it.

Security relay

The security relay is a simple add-on device which prevents unauthorised manipulation with the lock. It is installed between the intercom from which it is powered and the lock which it controls.
