

## Jabra GN1000 Remote Handset Lifter

Product Name: Jabra GN1000 Remote Handset Lifter

Manufacturer: -

Model Number: GN1000

### Jabra GN1000 Remote Handset Lifter

The GN1000 Remote Handset Lifter, allows you to answer and end calls directly from the Jabra GN wireless headset without having to return to your desk. The Jabra GN1000 works with virtually any telephone and can be installed in just a few minutes.

### Jabra GN1000 Key Features

- True wireless headset freedom for use with most desk phones
- Enables remote answer/end of call
- Universal design
- Special magnetic-field technology as ring sensor to avoid false calls

Answer and end calls directly from your wireless headset Use the Jabra GN1000 Remote Handset Lifter to lift and replace the handset via your wireless headset to answer and end calls, without having to physically lift or replace the handset on your telephone. When you hear the ring tone through your headset, simply push the button and you're connected. At the end of the call, just push the button again to hang up.

Never miss a call with auto-detection of the magnetic field of the phone's speaker Unlike other handset lifters that must be carefully adjusted to detect frequency-specific sounds, the Jabra GN1000 actually senses the magnetic field of the phone's speaker. When the phone rings, the lifter sends a signal to your headset's base to let you know there's an incoming call. That means you'll never miss a call.

Highly compatible with almost every business telephone There are no compatibility or reliability worries either. The Jabra GN1000's design is based on a comprehensive study of telephone specifications so it works with virtually all business telephones produced over the past 20 years. And in special endurance tests, it has lifted and lowered heavy handsets over 100,000 times without failure. The Jabra GN1000 is also incredibly easy to install – usually in less than two minutes.

### Jabra GN1000 Remote Handset Lifter Technical Specifications

#### Features

- Tested to lift and lower the heaviest handsets 100,000 times
- Near-zero footprint
- Magnetic-field technology "listens" to sound of the phone's speaker rather than a pre-specified frequency
- One-button operation
- Built-in on-line indicator lights up when phone is in use
- Compatible with virtually all telephones where the handset is on the left side of the phone

### Benefits

- High reliability and long lifetime
- Doesn't add to desk-top clutter
- Responds only to genuine incoming calls
- Perhaps the most simple handset lifter available
- Lets colleagues know that you are on the phone to help eliminate unwanted interruptions
- Sets up quickly and easily in less than two minutes
