

## Ascom d81 Messenger LF IP-DECT Handset

Product Name: Ascom d81 Messenger LF IP-DECT Handset

Manufacturer: -

Model Number: DH5-AABAAB

Please Note: Our Ascom phones do not come with a charger, this is an additional purchase from the drop down above.

Ascom d81 Messenger LF DECT IP Phone handset

The Ascom d81 Messenger LF is a robust, sophisticated IP phone handset. Advanced functionality and operating safety make it ideal for the most challenging settings such as industrial plants and secure establishments.

Ascom D81 Messenger LF Key Features

- Advanced messaging

- Poll location and special location functions

- Bluetooth

Designed for tough, challenging environmentsThe d81 can be relied on in the toughest working environments, where the handset is handled roughly and is exposed to the elements. Not only does it resist rain, humidity and dust, but the strong rubber casing protects the handset if dropped. It is tested for twice the standard level of static electricity and it endures both cold and heat. Adjustable low power setting to reduce risk of radio emissions interfering with sensitive equipment. There is also an intrinsically safe variant for operation in hazardous locations. Advanced functionalityBased on a proven IP-DECT operating platform with high volume and voice quality, the functionality of the d81 can be matched to the specific needs of your organisation and the individuals in it. The advanced messaging functionality of the d81 means smooth interaction with colleagues or machinery. For example, information from production processes can be sent directly to the handset. Thanks to centralised management, the handsets in the system can be automatically configured, upgraded and updated. Furthermore, the functionality of the d81 can be complimented through the application of a number of additional licenses. Advanced safetyThe advanced alarm functions include a manual alarm and an automatic mandown and no-movement alarm. Dual functionality lets the user make a call and send an alarm at the same time. The person sending the alarm can be pinpointed with high accuracy and the messages can be automatically sent to the handsets in closest proximity to any reported event. In short, the d81 can make a major contribution to minimising safety risks.

Ascom d81 Messenger LF Technical Specifications
