

Gigaset A690A DECT Handset

Product Name: Gigaset A690A DECT Handset

Manufacturer: Gigaset

Model Number: A690A

Gigaset A690A DECT Handset

The Gigaset A690A is a DECT Handset with an integrated digital answering machine. The A690A enables you to either make a call either the handset or in hands-free mode, giving you the freedom to do something else at the same time, even allowing others to join in the conversation. The Gigaset A690 features a large, illuminated, black-and-white graphic display. Gigaset A690A DECT Handset

- Integrated digital answering machine with up to 20 minutes of recording time
- Perfect voice quality with adjustable sound profiles
- Talk hands-free with superior audio quality
- Phonebook can store up to 100 names and numbers
- Illuminated black and white graphic display
- Call blocking for up to 32 blacklisted numbers

The large numeric display in dialling mode and the strong contrast between the black lettering and the white background have been designed to ensure that the telephone is even easier to use. The ergonomic keyboard with illuminated keys and intuitive handling also contribute to making talking on the phone as convenient as possible. Switch off once in a while - with protection against unwanted calls. You can add up to 32 numbers to your blacklist. When activated, this function either rejects calls from these numbers or simply shows them on the display without the phone ringing. You can add undesirable numbers to the blacklist manually or copy them from your call history. You can also prevent the phone from ringing for anonymous calls (i.e. those without caller ID) and even set time periods during which the phone should or shouldn't ring. You can also add selected numbers to a VIP group to ensure that these calls always come through even when Do Not Disturb is enabled. Stay in touch with a built-in phone book and a long talk time. The Gigaset A690 makes communication easy: With 14 hours of talk time, you can rest assured that you will always be able to talk to your contacts at any time. The device's integrated phone book can hold up to 100 names and numbers. In addition, the last 25 calls with the caller's number and the time at which they rang are listed automatically. Furthermore, with a standby time of 180 hours, callers will always be able to get hold of you. Even greater flexibility - with a multitude of compatible handsets. Use your phone wherever you need it: The Gigaset A690 can be expanded with up to four handsets, which you can place anywhere in your home. So whether you're in the kitchen, the bedroom or your home office, you'll always have a phone to hand. Always environmentally friendly - and radiation-free thanks to ECO DECT. Like all Gigaset cordless phones, the Gigaset A690 series is equipped with environmentally friendly ECO DECT technology. This means that the phones are radiation-free in standby mode, even when you're using multiple handsets, provided that the base and all connected handsets support ECO DECT too. During a call, the transmission power automatically adapts to the distance between the handset and the base. The smaller the distance between the handset and the base, the lower the radiation. For maximum DECT range, you can disable ECO DECT mode at any time.
