DrayTek Vigor 167 VDSL2 35b & ADSL2+ Modem (V167-K)

The DrayTek Vigor 167 has been thoroughly tested to deliver a stable and dependable DSL connection on all current UK VDSL2/ADSL+ networks. The Vigor 167 can be used as a basic router or as a standalone VDSL modem to pair with existing Ethernet WAN routers/firewalls. The DrayTek Vigor 167 is a plug-and-play device that network administrators can setup using existing routers and firewalls. The Vigor 167 can be easily linked with DrayTek multi-WAN routers like as the 2865, 2866, or 2962 series to provide load-balancing or failover protection that can be managed from a single system, simplifying configuration and management.
