- Bluetooth headset specially designed for open space offices with excellent sound, microphone with flip mute switch and wireless Qi charging
- Seamless switching between smartphone and computer
- Can be connected to several unifying peripherals via one receiver
- Works with all major telephone applications on almost all platforms and operating systems

Elevate Any Workspace Control your acoustic environment with Zone Wireless, the Bluetooth® headset designed to help you communicate, collaborate, and concentrate in busy workspaces.

Get Focused. Stay Focused It can be hard to concentrate while working from home these days. With active noise cancellation that reduces unwanted ambient sound, a Zone Wireless headset can help you focus on the task at hand and get more stuff done. Think of it as a personal portal to acoustic serenity amidst a sea of otherwise distracting noise. Same workspace, but with a sound experience that you control.

Great For Music And Talking Treat yourself to immersive sound when listening to music. Logitech audio engineers have been fine-tuning headset audio for decades, and the results are amazingly clear when you experience your own music with Zone Wireless. For phone chats and conference calls, the noise-cancelling mic isolates your voice from the noise around you for clearer conversations and a side tone control helps you modulate the volume of your voice to just the right level.

Certified For Microsoft Teams Launch a Microsoft® Teams meeting and pick-up or answer a Teams call with a single touch. Or apply a longer touch to invoke Cortana® voice skills. It's that simple. Zone Wireless is Certified for Teams to ensure a seamless audio experience when using Teams to chat, meet, call or video conference. The Teams version of Zone Wireless also fully supports Skype® for Business. Get the right equipment to work effectively in open offices, at home or from anywhere.

Simple Controls, Easy To Use Zone Wireless provides an intuitive and simple interface to adjust volume, play/pause music, and start/end calls. The mic boom features a flip-to-mute function, plus button controls provide easy access to power, active noise cancellation, and wireless Bluetooth pairing. Zone Wireless supports wireless Qi charging and includes a mobile companion app that supports easy setup and simple control for headset functions like side tone modulation and EQ presets.

All-Day Comfort Zone Wireless is designed for use all day, every day. The silicone-padded headband is lightweight and provides just the right clamping force for a fit that's so comfortable you might forget you're wearing a high-performance headset. Soft leatherette ear pads are cushiony and breathable, so your ears don't get hot. Zone Wireless blocks sound from the moment you put it on, and the foldable design makes it handy to stow when you take the headset off.

Connect Multiple Devices Designed for mobile workers, Zone Wireless provides the versatility to wirelessly connect to your computer, tablet, and smartphone simultaneously and seamlessly switch between connected devices at will. The 30m wireless range provides freedom to roam

Logitech Zone Wireless MS Bluetooth Wireless ANC Headset (981-000854)

while staying connected. Transition between phone chats, video conferencing, music, and general noise reduction throughout your day—all with the same headset and happy-making acoustic performance.

Full Control With Logi Tune Open the Logi Tune mobile app on your smartphone or Tune Desktop on your computer to easily setup, control, and customize your Zone Wireless headset. From the elegantly intuitive dashboard, confidently manage mute, view charging status, modulate side tone controls, and tweak the 5-band EQ sliders (or choose one of the custom presets). Keep your headset up-to-date by downloading the latest software from either the mobile or desktop app.

Ready For Business Universally compatible to work with common calling applications across most all platforms and operating systems. Business certifications include Microsoft Teams and Skype for Business, certified for Google Meet and Voice®, compatible with integrated mute controls for Zoom®, and works with other popular applications like Cisco Jabber®, BlueJeans, and GoToMeeting® to ensure compatibility and seamless integration in the workplace.
