Logitech Logi Dock UC - Graphite (986-000024)

Product Name: Logitech Logi Dock UC - Graphite (986-000024)
Manufacturer: Logitech
Model Number: 986-000024

Logitech Logi Dock UC - Graphite (986-000024)
The Logitech Dock UC is an all-in-one docking station with a sleek, modern design that enhances any workspace and is perfectly suited to today's hybrid work and flexibility. The Logitech Dock UC can be used at personal workstations in the office or home for telecommuting, as well as in small meeting spaces, such as large meeting rooms, and allows you to efficiently declutter your space. Logitech LogiDock Key Features

ï¿½ HD Audio Technology: background noise and echo cancellation
ï¿½ 6 beamforming microphones with advanced algorithms
ï¿½ Microphone frequency response: 65Hz - 8kHz
ï¿½ Integration of 2 custom neodymium audio drivers: exceptional sound clarity
ï¿½ Speaker size: 55mm
ï¿½ Speaker Frequency Response: 60Hz - 20kHz
ï¿½ Support for automatic audio switching
ï¿½ Smart Switch technology: automatically switches sound between speaker and headphones or earphones
ï¿½ Audible alerts and beeps: signal incoming calls for meetings
ï¿½ Visual alerts: light for microphone status, camera status, incoming calls and current call status
ï¿½ Controls: direct access to meetings, volume control, microphone mute, camera on/off, Bluetooth pairing

Control all your connections
Logitech Dock saves you time and space when you're setting it up. Just plug it into your computer and power it up, and it's instantly ready to use. It's equipped with 5 USB ports and Bluetooth wireless connectivity, which allows you to easily pair a wireless keyboard or mouse to save space on your desk. You can also easily connect a smartphone or tablet for media playback. In addition, its multiple available USB ports allow simultaneous connection and charging of multiple devices so that all of them are close by, without the need to use multiple PC ports or multiple power outlets.
Keep your workspace tidy
Logitech Dock by Logitech is a multifunctional business solution. It is designed to maintain order in professional spaces, as well as act as a remote meeting management box. Indeed, this station is equipped with several control keys that allow you to manage, with a single click, the settings of your video conferences, without any intervention on the computer. Using these control keys, you can, among other things: start or join a meeting directly thanks to the synchronisation of the agenda via the LogiTune application, adjust the volume, mute the microphone, activate or deactivate the camera or activate Bluetooth pairing.
Clear and immersive sound for your meetings
Equipped with powerful audio components, the docking station and speakerphone allows professionals to enjoy the most immersive experience during their remote meetings. It features a 6-microphone beamforming array and two 55 mm neodymium speakers, enabling high-definition transmission of opposing sounds and speech without unwanted distractions thanks to the background noise cancellation algorithm. Intelligent Audio Switch technology reinforces the aforementioned flexibility by allowing automatic sound switching between the speaker and wireless headphones as soon as they are paired with the base via Bluetooth and turned on. This means that everyone has the freedom to conduct their meetings the way they want, depending on the environment they are in, to always enjoy HD sound quality.
