

Snom A230 USB DECT Dongle

Product Name: Snom A230 USB DECT Dongle

Manufacturer: Snom

Model Number: A230

Snom A230 USB DECT Dongle

Everyday office life frequently requires flexible communication with hands-free calling and an easy conference solution. The Snom A230 DECT Dongle extends your Snom desk phone (with USB connection) in two ways: firstly it offers you the option to connect the Snom A150 headset (included with the Snom A230 DECT Dongle); secondly, it gives you a three-step, flexible conference solution that works with all desk phones from the Snom D8XX, D7xx and D3xx series that have a USB connection.

Key Features

- Adds DECT option to Snom phones
- Allows connection Snom A150 and Snom C52-SP
- Plug & Play
- Pairing button with LED

And that without any technical effort or additional phone number. You simply use the existing Snom desk phone as usual. The Snom A230 DECT USB dongle is connected via the existing USB port of the Snom desk phone and from then on serves as a DECT base.

Calls can be placed directly through the Snom A230 once a connection has been established to the Snom C52 SP and/or Snom A150.
